

WhatNext Vision Motors

Shaping the Future of Mobility with Innovation and Excellence

USER STORY

As an operations manager at WhatNext Vision Motors, I want to manage vehicle orders, customers, deliveries, and payments efficiently using a Salesforce-based application. The system automates order processing, delivery tracking, and reporting for better decision-making.

1. INTRODUCTION

1.1 Project Overview

The system is a Salesforce-based CRM solution designed to manage vehicle orders, deliveries, customers, and payments. It improves efficiency and customer satisfaction.

1.2 Purpose

- Automate vehicle order processing
- Improve delivery tracking
- Enhance customer relationship management
- Generate reports and dashboards
- Automate notifications

2. IDEATION PHASE

2.1 Problem Statement

Automobile companies face challenges in managing orders and tracking deliveries manually. This system solves these issues using automation.

2.2 Target Users

- Sales Managers

- Operations Team
- Admin Users
- Customers

3. REQUIREMENT ANALYSIS

3.1 Functional Requirements

- Vehicle Order Management
- Delivery Tracking
- Email Notifications
- Report Generation
- Dashboard Analytics

3.2 Non-Functional Requirements

- Security
- Scalability
- Performance
- Reliability
- Availability

4. PROJECT DESIGN

4.1 Custom Objects

- Vehicle Order
- Delivery
- Customer
- Vehicle

4.2 Automation

- Flow Automation
- Apex Classes
- Triggers

5. PROJECT DEVELOPMENT

Milestones:

1. Salesforce Setup
2. Object Creation
3. Field Creation
4. Relationships
5. Flows
6. Apex Classes
7. Triggers
8. Reports
9. Dashboards

6. APEX CLASSES

- VehicleOrderTaskCreator
- VehicleOrderStatusUpdater
- VehicleOrderTotalUpdater
- VehicleOrderEmailSender
- DeliveryHelper

7. TRIGGERS

- VehicleOrderTrigger

8. REPORTS & DASHBOARDS

- Vehicle Orders Report
- Delivery Report
- Payment Report

9. TESTING

- Apex Test Classes Created
- Code Coverage Achieved

10. CONCLUSION

The system improves vehicle order management, delivery tracking, and customer communication.

11. FUTURE SCOPE

- Mobile App Integration
- AI-based Prediction
- SMS Notifications
- Inventory System
